2001 CBC - Chapter 19A
CONCRETE

Section - **1905A - CONCRETE QUALITY, MIXING AND PLACING**

Subsection(s) - **1905A.10.9 - 1905A.10.10**

1 1905A.10.9 *In depositing concrete in columns, walls or thin sec-*
2 *tions of considerable height, openings in forms, elephant trunks,*
3 *tremies or other approved devices shall be used that will permit*
4 *the concrete to be placed in a manner that will prevent segregation*
5 *and accumulations of hardened concrete on the forms or metal re-*
6 *inforcement above the level of the concrete. Unless otherwise ap-*
7 *proved by the enforcement agency, the unconfined vertical drop of*
8 *concrete from the end of such devices to the placement surface*
9 *shall not be greater than 6 feet (1829 mm).*

10
11 1905A.10.10 *Where conditions make consolidation difficult, or*
12 *where reinforcement is congested, batches of concrete adjusted to*
13 *use smaller size aggregates than specified in the mix design shall*
14 *be used as approved by the architect, structural engineer and the*
15 *enforcement agency.*
