

DSA Structural Amendments under review are highlighted in GRAY

Template 19-26

2001 CBC - Chapter 19A  
CONCRETE

Section - 1909A - STRENGTH AND SERVICEABILITY  
REQUIREMENTS

Subsection(s) - 1909A.3.1.1

1 1909A.3 Design Strength.

2 ● ● ● ●

3

4 1909A.3.1.1 If the structural framing includes primary members  
5 of other materials proportioned to satisfy the load-factor combina-  
6 tions of Section 1928A.1.2, it shall be permitted to proportion the  
7 concrete members using the set of strength-reduction factors,  $\Phi$ ,  
8 listed in Section 1928A.1.1 and the load-factor combinations in  
9 Section 1928A.1.2. *The provisions of this section shall not be used*  
10 *if resistance to specified earthquake loads or forces E are included*  
11 *in the design.*
