

DSA Structural Amendments under review are highlighted in GRAY

Template 19-46

2001 CBC - Chapter 19A
CONCRETE

Section - 1921A - REINFORCED CONCRETE STRUCTURES
RESISTING FORCES INDUCED BY
EARTHQUAKE MOTIONS

Subsection(s) - 1921A.5.4.5

1 1921A.5 Joints of Frames.

2 ● ● ● ●

3
4 1921A.5.4 Development length for reinforcement in tension.

5 ● ● ● ●

6
7 1921A.5.4.4 If epoxy-coated reinforcement is used, the develop-
8 ment lengths in Sections 1921A.5.4.1 through Section
9 1921A.5.4.3 shall be multiplied by the applicable factor specified
10 in Section 1912A.2.4 or 1912A.5.3.6.

11
12 1921A.5.4.5 Splices shall be based on the development length,
13 ℓ_d , for a straight bar as determined by Sections 1921A.5.4.1 and
14 1921A.5.4.2 and modified by the factors in Section 1912A.
