

DSA Structural Amendments under review are highlighted in GRAY

Template 19-64

2001 CBC - Chapter 19A
CONCRETE

Section - 1929A - TESTING AND INSPECTION

Subsection(s) - 1929A.6

1 1929A.6 Waiver of Material Testing. Tests of cement and rein-
2 forcing bars may be waived by the architect or structural engineer
3 with the approval of the enforcement agency for one-story build-
4 ings where the specified compressive strength of the concrete f_c
5 delivered to the jobsite is 3,500 psi (24.13 MPa) and where the f'_c
6 used in design is 2,500 psi (17.24 MPa).
