3

4 *2104A.4.5 Corbeling. Corbels may be built only into solid-ma-*
5 *sonry walls 12 inches (305 mm) or more in thickness. The projec-*
6 *tion for each course in such corbel shall not exceed 1 inch (25*
7 *mm), and the maximum projection shall not exceed one third the*
8 *total thickness of the wall when used to support structural mem-*
9 *bers, and not more than 6 inches (152 mm) when used to support a*
10 *chimney built into the wall. The top course of all corbels shall be a*
11 *header course.*
