

DSA Structural Amendments under review are highlighted in GRAY

Template 21-22

2001 CBC - Chapter 21A
MASONRY

Section - 2106A - GENERAL DESIGN REQUIREMENTS

Subsection(s) - 2106A.1.9

1 **2106A.1.9 Pipes and conduits embedded in masonry.** Pipes or
2 conduit shall not be embedded in any masonry. * * *

3
4 **EXCEPTIONS:** 1. Rigid electric conduits, *steel or nonmetallic*,
5 may be embedded in structural masonry when their locations have
6 been detailed on the approved plan.

7
8 2. Any pipe or conduit may pass vertically or horizontally through
9 any masonry *in locations detailed on approved plans* by means of a
10 sleeve at least large enough to pass any hub or coupling on the pipeline.
11 Such sleeves shall not be placed closer than three diameters, center to
12 center, nor shall they unduly impair the strength of construction.
